

Revision: A

chroma+scan 3x00 Release Notes

Version 4.11.12.23 (previous version: 4.11.12.8)

New Features:

Support for A series models

This release contains support for the 3100A, 3150A, 3300A, and 3301A models. The 3100A and 3150A can be run with all other 31xx models in the same system, and the 3300A and 3301A can be run with all other 33xx models in the same system. All A series models require a minimum firmware upgrade package of 4.11.12.23. The 3100A and 3150A can be placed into a system already running 4.11.11.31 and higher. The 3300A and 3301A can only be placed into a system running 4.11.12.23 and higher.

Fixes:

System backups contain invalid timestamp

Previously, the *Server->Backup* command in kClient would produce a backup containing an invalid timestamp. This has been fixed.
