

SPR04 Sensor Discontinuation Notice

Posted on December 14, 2005

Dear SPR04 Sensor Customers,

For the past 7 years the Dynavision SPR04 has been providing the wood industry with a highly accurate profiling and measurement solution. With the changes LMI is making to the product lineup we have decided effective March 31, 2006 LMI will discontinue the sale of the SPR04 sensor. Support for and repair of these sensors will continue for years to come to ensure that the install base of these sensors and our customers are well supported.

In place of the SPR04 LMI is proud to offer the DLS2000A family of sensors. The DLS2000A product family offers the following improvements over the SPR04:

- Improved performance with scan rates of up to 1.8 KHz
- A more durable connector which environmentally seals the sensor
- A variety of measurement ranges to better suite your application

The DLS2000A sensors are industry proven by providing improved performance in applications such as log profile scanning for peelers, thickness detection for sorting and classification, and end of log detection.

If you require any further information regarding the DLS2000A models please visit our website at www.lmi3d.com to download the product brochure or give us a call at 604-636-1011.
