

WLS End Of Life Notice

Posted on June 14, 2012

Dear WLS Customer,

In order to provide you the best possible notice to plan for your sales, marketing and product development activities LMI Technologies is announcing an End of Life (EOL) on the following selected products.

These products were available for sale at the published prices up to and including the Last Time Buy (LTB) date. After the LTB date, these products will be supported for repair for a service period of several years from the LTB Date. The service period was an estimate, which was based on component availability. When components became obsolete, LMI Technologies did a last time buy to secure inventory based on historical repair volumes. Unfortunately we are now running out of these components and we can no longer source any more. LMI may not be able to service all sensor failure types throughout the Service Period due to component availability. The ability to service a sensor will be decided at LMI's discretion and on a case by case basis.

Part Description	Part Numbers	Product Type	LTB Date	Service Period	Replacement Product
EyeCon 100 & WLS400.003	30100	Sensor	December 31, 2009	Up to March 31, 2013	Gocator 2050

TABLE 1 - Product(s) affected by this announcement and associated timelines.

LMI is aware that this may have an impact on your organization. We want to work closely with your company to review your product migration and help you to interface with LMI's newer generation products. Our Business Development Manager will be in contact with you to discuss this transition period directly and address any questions or concerns regarding these changes.
