

HexSight Version 5.0 Launch

Posted on November 4, 2014

Dear HexSight customer,

LMI Technologies is excited to announce the launch of HexSight version 5.0. This version provides the following new features and enhancements:

- * 64-bit support* for improved memory usage and native processing on 64-bit systems.
 - * Greatly improved performance compared to HexSight 4.3 and 4.4.
 - * Support for QR codes in the barcode reader.
- The license structure for HexSight 5.0 remains the same as for HexSight 4.x, but with new part numbers:

License	Part Number
Express - Base tools, No Locator	301004
Professional - All tools	301005
Locator - Locator only	301006
Premium - All tools + Symbology	301007

The pricing of version 5.0 is identical to the pricing of version 4.x.

NOTE: HexSight 5.0 is sold with a new dongle (required), which is not compatible with HexSight 4.x.

LMI will continue to sell and support HexSight 4.x.

If you have any questions or wish to order, please contact an LMI Sales Representative at sales@lmi3d.com. You can download the software and release notes at <http://lmi3d.com/support/downloads/hexsight>.

* The OCR feature is not supported in the 64-bit version.
