EOL: HDI 109, 120 END OF LIFE NOTICE

This is an end of life (EOL) product notice for the HDI 109 and 120. The replacement product for the HDI 100 series is the recently released Gocator 3210 that combines the resolution of the HDI 109 with a larger field of view - all within a single sensor model. In addition, the Gocator 3210 offers a new industrial light source that is 3x brighter (compared to HDI 109) with a continuous operational lifetime of up to 10 years.

The Gocator 3210 will be supported by FlexScan3D in the coming months which allows an easy transition to the new hardware platform. The development of FlexScan3D is now being managed by Polyga - a Thomas Tong company. Your current applications can then easily be adapted to work with this combination of Gocator 3210 and FlexScan3D.

To support your transition to the Gocator 3210, the HDI 109 and 120 will continue to be available for sale from the date of this notice up to and including the Last Time Buy (LTB) date noted below.

After the LTB date, LMI Technologies will offer service and repair until the Forecasted Service End date, which is calculated from the LTB date. The service period is an estimate, which is based on component availability. Where components have become obsolete, LMI Technologies has completed a last time buy to secure inventory based on historical repair volumes.

Part Description	Part Numbers	LTB Date	Forecasted Service End	Replacement Product
HDI 109	61109A-B 61109A-B-O	Dec 31, 2017	Dec 31, 2019	Gocator 3210 (313210A-LED-B-01-S)
HDI 120	61120A-B	Dec 31, 2017	Dec 31, 2019	Gocator 3210 (313210A-LED-B-01-S)
Note: Service period of repaired devices expire when the service period ends.				

LMI is committed to provide long-term service on our sensors, and we will help you convert your existing projects to using the new sensors.

Please contact your Sales manager and/or distributor for further details in regards to this EOL notice.

For questions regarding FlexScan3D and its Gocator 3210 support, please contact Polyga (contact@polyga.com).
