Product Change Notification: Update on New Gocator 3520 Hardware Version

This is an update on the [previously announced 3520 B hardware version](#). Initially scheduled for June 2024, LMI has finished allocating the final 3520A sensors to orders. The new B hardware version will be available for shipment starting **the week of August 5th, 2024**.

This change was made to replace obsolescent electronic parts with equivalent components. As such, the performance and physical specifications of the B version are identical to the A hardware version.

- An upcoming firmware update, **6.3 SR2**, will be required.
- **You can accelerate both A and B hardware version sensors** with the same firmware, provided you use Gocator Firmware 6.3 SR2 or higher.

As previously communicated, this is the End of Life (EOL) of the existing Gocator 3520 A hardware version. LMI will transition all future Gocator 3520 orders to the new version, and any new orders placed should indicate the B version part number.

Part Description	Current Part Number	New Part Number
Gocator 3520	313520A-LED-B-01-S	313520B-LED-B-01-S

Service Window for A Hardware Versions

Any A hardware versions returned for repair after June 2024 will not change version where possible, but in some cases may be returned as a B hardware version.

We apologize for any inconvenience this may cause. If you have any questions, please write to contact@lmi3d.com or contact your LMI Account Manager.
