## **Product Notification: GoPxL 1.4 Pro Utilities Update — Windows KB Compatibility Fix**

Please be advised that the **GoPxL 1.4 Pro Utilities** package on the LMI website has been updated to resolve a crash issue caused by Windows updates KB5074105 and KB5077181.

**If you have previously downloaded the GoPxL 1.4.43.23 Pro Utilities package, please [download the updated version](#) to replace it.**

The Windows updates began rolling out this month and created a conflict with several of the new image tools in the original GoPxL 1.4.43.23 Pro Utilities package. Specifically, adding any of the following tools—or loading a job that contains them—causes the GoPxL instance to crash, resulting in a "Connection Lost" message:

- Image OCR
- Image Barcode
- Image Matrix Code
- Image Pattern
- Image QR Code

We have updated the [GoPxL Pro Utilities download resource page](#) and the [release notes](#) to highlight this change.

Best regards,  
—The LMI Team—
